

# OcuDerma<sup>®</sup> Testimonials

"I recommend OcuDerma to patients on a daily basis for helping to keep the skin around the eyes healthy. It is especially appropriate for contact lens wearers because OcuDerma is formulated as a non-oily gel that, even if it does creep into the eyes, will not cloud the lenses."  
— Kathryn R., Optometrist, Chesterfield, MO

"I have been using OcuDerma for over six years. Not only does it help reduce the appearance of fine lines and wrinkles, it really keeps the skin around my eyes supple and soft --- thank you"  
— Rosann B., Pittsburgh, PA

"OcuDerma is really amazing. I used to use 2 or 3 different high priced department store products for eye treatment. Once I started using OcuDerma, not only did I get better results --- I saved a lot of money"  
— Lynette H., Union, KY

"I began using OcuDerma to help with the dark circles around my eyes. My experience has been excellent and I can see a noticeable reduction in their appearance."  
— John P., Zelenople, PA

"My eye doctor recommended OcuDerma to me a few years ago and I have been using it routinely ever since. I really like that it is not greasy like some creams, and, following application, I can easily put make-up right on top."  
— Helen H., Rancho Santa Fe, CA

"This is the best product for care of the skin around the eyes. I have everyone in my family using it. Thank you."  
— Dawnia A., Milwaukee, WI

"I could notice an improvement in the overall appearance of the skin around my eyes within six weeks of using OcuDerma. It also was very gentle on my extremely sensitive skin — great product!"  
— Debbie C., Ft. Lauderdale, FL

"Since we placed OcuDerma in our optical dispensary, patients not only make initial purchases but repurchase rates are amazing — patients love the product and tell friends and family — we have actually seen new patient visits as a result of OcuDerma purchase referrals."  
— Howard S., Ophthalmologist, Washington, MO

## Improved, Updated Formula

OcuDerma<sup>®</sup>, advanced skin care, was developed by a female optometrist for the delicate skin surrounding the eyes.

- With regular daily use, OcuDerma is designed to help reduce the visible signs of aging around the eyes; revitalizing and toning the skin.
- A triple complex of super-cooling and smoothing peptides help reduce under eye bag volume by decreasing capillary permeability, improving lymphatic circulation and improving firmness and elasticity.
- OcuDerma also contains a blend of unique extracts, locust bean and hyaluronate that instantly makes the skin around the eyes feel tighter and look firmer. They also help lift the upper eyelid, reduce the appearance of "crow's feet", and diminish the appearance of under-eye bags and puffiness.
- The gel formula is slightly tinted, smooth, non-greasy and non-sticky.
- OcuDerma utilizes the highest quality ingredients that provide the most biocompatible and practical application for all skin types.
- No fragrances, artificial dyes, parabens, sensitizers or pore clogging agents.
- Compatible for contact lens wear.

### COMPLETE EYECARE COSMECEUTICAL

**Refirms** — Helps minimize the appearance of fine lines, tightens and tones the skin.

**Diminishes** — Decreases the appearance of dark shadows and circles.

**Depuffs** — Diminish the appearance of under-eye bags and puffiness; revives tired, fatigued eyes.

**Hydrates** — Supplies immediate moisture deep into skin.

**Protects** — Guards against free radical damage.

...all in one product!

## OcuDerma<sup>®</sup> is uniquely formulated for the delicate skin around the eyes.

Why is ocular skin different?

The skin around the eyes is extremely thin, fragile, and sensitive. The first signs of aging begin

here. Continuous facial expressions, fatigue, stress and environmental factors concentrate damaging effects on the skin in the eye area. Because there are few oil glands on the skin around the eyes to provide natural protection, it is a vulnerable area.

What can you do to keep ocular skin healthy?

Get enough sleep, exercise, drink plenty of water, eat healthy and use OcuDerma, ocular skin therapy, twice a day.

### Why OcuDerma?

Unlike other products for the skin, OcuDerma was formulated by eye doctors specifically for their patients. It contains the ingredients you need and does not have the ingredients that could be harmful to you....making it ideal for even the most sensitive skin.

OcuDerma is formulated to reduce the visible signs of aging around the eyes. The

super-cooling and smoothing peptide packed gel helps revitalize this area of delicate skin.

A triple complex of advanced peptides helps reduce under eye bag volume by decreasing capillary permeability, improving lymphatic circulation and improving firmness and elasticity.

OcuDerma also contains a blend of unique extracts, locust bean and hyaluronate that instantly makes the skin around the eyes feel tighter and look firmer. They also help lift the upper eyelid, reduce the appearance of "crow's feet", and diminish the appearance of under-eye bags and puffiness. OcuDerma eye gel is also fragrance-free, contains no artificial dyes, sensitizers or pore clogging agents.

And because OcuDerma is the "Complete Eyecare Cosmeceutical" skin care product, it will cost you less over the long term. No need to purchase multiple products to maintain total care of the skin around the eyes --- OcuDerma does it all!

### How is OCUDERMA supplied and how do you use it?

OcuDerma is available in a 0.5 oz. pump container. The pump helps to minimize the chance of contamination by eliminating the need to dip fingers into a jar.

OcuDerma should be administered twice daily, in the morning and evening, after cleansing. Apply gel to outer area of the skin around the eyes then work inward, patting gently to disperse evenly. Allow to dry completely. OcuDerma can be used alone or under make-up. It can also be used around the lips.

NOTE: OCUDERMA IS NOT FOR USE IN THE EYE.
